PROJECTS

Chat app

📅 07/2024 - 07/2024 📍 Location

This is a social media application, with MERN technology

- Developed and designed a real-time chat app with effortless messaging, user authentication, and media sharing features. Incorporated WebSockets for real-time communication, providing a responsive and smooth user experience. Improved security through end-to-end encryption, enhancing data privacy and user confidence

Music Player

📅 08/2024 - 08/2024 📍 Location

Music Player, playing songs

- .

CRUD

📅 06/2024 - 06/2024 📍 Location

user creation, deletion, update and read

- .

Build AI interview mocker

📅 01/2025 - 02/2025 📍 Location

Short summary of your work

- Created an AI-based interview mocker with real-life interview simulations, instant response feedback, tone, and confidence. Improved the interview readiness of candidates by using machine learning and natural language processing and resulting in better job interview success rates

INTERESTS

🎬 Watching movies

SUMMARY

Frontend Developer in the design, development, and deployment of dynamic web applications based on MongoDB, Express.js, React.js, and Node.js. Experienced in building responsive, scalable, and high-performance web solutions from conception through deployment. Comprehensively educated in front-end and back-end technologies with the ability to integrate APIs, maximize performance, and provide an outstanding user experience. Skilled in working with cross-functional teams to provide innovative solutions and project success. Highly committed to being informed about current trends in the industry and optimizing development practices continuously.
